

Massey Ferguson Power Steering Pumps

Power Steering Fluid Level Recommendation

- It is critical that the correct amount of power steering oil be used in the steering system. Too much oil will blow out the front seal. In most cases the pump reservoir will only be ½ to ¾ full.
- After pump has been installed and oil has been added, loosen fill cap, start tractor and cycle the steering through its full range of travel 3-4 times. Now is when the steering fluid level needs to be checked. On tractors equipped with one steering cylinder, make sure the cylinder is fully retracted before fluid level is checked. Models with two steering cylinders should be checked with the wheels straight ahead.
- If reservoir is completely full, remove enough oil so reservoir is 2/3 full.

The capacities below are for the complete system!

Pump#	523089M91	523090M91	523092M91	523093M91
	MF1080 3qt.	MF165 1 ¾ qt. (dsl)	MF165 1 1/3qt. (gas)	MF180 1 2/3 qt.
	MF1085 3qt.	MF204 1qt.	MF175 1 2/3 qts.	
	MF 285 3qt.	MF255 1 qt.	MF255 1 qt.	
		MF265 1qt.	MF265 1 qt.	
			MF275 1qt.
